EXPERIENCE

My background is in pediatric critical care and I am very pleased to bring this experience to the law firm. I began my nursing career at the University of Minnesota Children's Hospital, where I practiced high-acuity care of children and their families, from neonates to teenagers. From there I transitioned to home-based palliative care and hospice at Children's Hospital where I visited children in their homes.

I enjoy developing relationships with the individuals that I serve and helping them work through the challenging situations they face. This work allows me to deliver the same level of care I previously provided at the bedside to those that have suffered negligence. The most rewarding part of my role is advocating for others.
